

FAISAL ALSHARARI

Computer and Network Engineer

+966554447552 · enc.faisal@gmail.com · [LinkedIn](#) · Riyadh, Saudi Arabia

PROFESSIONAL SUMMARY

Computer and Network Engineering graduate with hands-on experience in server administration, network infrastructure, and full-stack application development. Skilled in Linux and Windows Server environments, domain and hosting management, and database administration. Developed and published multiple games and VR experiences using Unity and Blender. Graduation project delivered an RFID-based human-following smart robot, progressing from full VR simulation to a working hardware-software integration. Seeking to apply technical skills in network engineering, systems administration, or IT infrastructure.

KEY COMPETENCIES

- Computer Network Management
- Server Administration (Linux & Windows Server)
- Domain & Hosting Management
- VR & Game Development (Unity, Blender)
- Database Management & Design
- Programming: C#, Python, SQL, JavaScript, C++
- Troubleshooting & Technical Problem Solving
- Website Development
- Networking & Cybersecurity Fundamentals

GRADUATION PROJECT

RFID-Based Human-Following Smart Robot

2025

- Designed a smart robot using RFID technology to track and follow a user carrying an RFID card, aimed at accompanying users and assisting with carrying items.
- Built a complete Virtual Reality (VR) simulation of the system in Unity prior to physical development, validating tracking logic and user interaction design.
- Integrated hardware and software components to translate the VR simulation into a functioning physical prototype with real-time tracking.

PRACTICAL EXPERIENCE & ACTIVITIES

Game & VR Development | Independent Projects

Ongoing

- Developed and published games and interactive VR experiences using Unity and Blender, covering full development cycles from design to deployment.
- Applied skills in C#, 3D modeling, and real-time interaction design across multiple released projects.

Server & Infrastructure Management

Self-Directed

- Administered Linux and Windows Server environments, including domain configuration, web hosting, and database management over 1-3 years of hands-on practice.
- Gained practical experience in server uptime management, performance monitoring, and user data handling.

Volunteer Work

- Completed over 600 hours of volunteering through the National Volunteer Work Platform.
- Served over 8 years with the Saudi Scout Association supporting Hajj services operations.

EDUCATION

Bachelor's Degree in Computer and Network Engineering | Al Jouf University, Sakaka

2025

COURSES

- CCNA: Introduction to Networks | Cisco — Dec 2023
- Ethical Hacker | Cisco — May 2025
- Introduction to the Internet of Things | Cisco — Jul 2026

LANGUAGES

Arabic: Mother tongue. English: Excellent.
